CERTIFICATE

This is to Certify that this report is submitted by

Mr./Ms. Kaushal Kumar Ray PRN 240205241023

Roll No. / University Roll No. 29 a student of First semester of the

course B.Tech CSE with AIML as a part of Practical as prescribed by the University

Syllabus for the subject Communication Skills during the Academic

year 2024 and that I have instructed / guided him / her for the said work from

time to time and found him / her to be satisfactory progressive.

Experiment No: 1

TITLE: Introducing oneself, Exercise on parts of speech.

AIM:

- 1) To practice effective self-introduction skills for various contexts.
- 2) To improve understanding and usage of parts of speech in sentence construction.

Requirements:

Notebook, pen, worksheet, on parts of speech and role-playing materials.

Part: I introducing oneself

Theory:

Introducing oneself is an essential communication skill that involves sharing key information about oneself, such as name, background, and interests, to make a positive first impression. Practicing self-introduction in both formal and informal settings can improve confidence and interpersonal skills.

Procedure / Activities:

Self-Introduction practice:

- Introduce yourself to classmates or in small groups, including details like your name, academic interests, and hobbies.

Role-Play Exercise:

Pair up and simulate different scenarios, such as a job interview or a casual meeting to practice adapting your self-introduction for various audiences.

Feedback and Refinement

- Exchange feedback with peers to improve clarity, confidence, and presentation style.

Part 2: Exercise on parts of speech.

Theory:

Understanding parts of speech such as nouns, verbs, adjectives, adverbs, and others is fundamental for forming correct sentences. Mastery of these elements enhance one's ability to communicate clearly and grammatically.

Procedure/Activity

Identify parts of speech:

- work through provided sentences to identify the parts of speech of each word.
- sentence creation exercise.
- create sentences that emphasize a specific part of speech (e.g. a sentence with a focus on adjective verbs).

Collaborative Exercise

- Form sentences as a group activity, with each member contributing words from specific parts of speech to build varied sentences.

Experiment No: 2

Title: Exercise on tense

Aim: To enhance understanding of verb tenses and their correct usage in different context for clear and effective communication.

Requirements:

Notebook, pen, worksheet on verb tenses, and sentence-building exercise

Theory:

Tense is a grammatical concept that indicates the time of action or state expressed by a verb. There are three main tense in English: present, past and future. Each tense can be further divided into four aspects - simple, continuous, perfect, and perfect continuous - providing specific nuances to indicate ongoing, completed, or habitual actions.

- Present tense: Describes actions happening now or habitual actions.
- Past tense: Refers to actions completed in the past.
- Future tense: Indicates actions that will happen later.

Understanding and using tenses accurately is essential for conveying the correct time frame and meaning in both spoken and written communication.

Procedure / Activity

Identifying tense type:

- Review sentences provided in a worksheet and identify the tense used in each.

Fill in the blanks exercise

- Complete sentences with the correct form of verbs to practice using tenses appropriately.
- Rewrite sentences in different tenses (e.g., change from present to past, or future to past continuous).

Role-play with Tenses:

- Role-play a conversation where you naturally use different tenses to narrate events or plans. For example, recount a past experience, describe a current routine, and discuss future goals.

Experiment No: 3

Title: Exercise on Agreement, Narration

Aim:

- To understand and apply Subject-verb agreement rules in sentences construction.
- To practice converting direct speech to indirect speech (Narration) accurately.

Requirements:

Notebook, pen, worksheets on Subject-verb agreement and narration.

Theory:

Subject-verb agreement is the grammatical rule that the verb must match the subject in number and person. Ensuring agreement is essential for clarity and accuracy in communication.

Singular subjects take singular verbs. (e.g., "She writes every day").

Plural subjects take plural verbs (e.g., "They write everyday").

Special cases include compound subjects, collective nouns and indefinite pronouns.

Procedure/Activities

Identify Errors:

- Read sentences provided in a worksheet and identify errors in subject-verb agreement.
- Rewrite sentences with correct Subject-verb agreement.
- Formulate sentences that correctly demonstrate Subject-verb agreement with singular and plural subjects.

Part 2 Narration

Theory:

Narration involves converting direct speech to indirect or reported speech. This requires changing pronouns, verb tense, and time expression based on the reporting verb.

Direct speech: Quotes the exact words spoken (e.g., she said, "I am happy").

Indirect speech: Reports what was said without quoting exactly. (e.g., she said that she was happy).

key rules including changing pronouns, adjusting tense, and modifying time expressions (e.g., "now" becomes "then," "today" becomes "that day").

Procedures / Activities:

- practice converting sentences from direct speech to indirect speech and vice versa.
- convert a short conversation or dialogue to indirect speech
- In pairs, one person narrates events in indirect speech based on prompts, while the other listens and gives feedback.

Experiment No: 4

Title: Active passive voice & Dialogue conversation

Aim:

- To understand and practice converting sentences between active and passive voice.
- To develop conversational skills through structured dialogue exercises.

Requirements

Notebook, pen, worksheet on active-passive voice, and dialogue prompts for conversation practice.

Part 1: Active - passive voice

Theory:

Active and passive voice are two different ways to construct sentences, focusing on either the subject performing the action or the object receiving the action.

Active voice: The subject performs the action (eg. "The teacher explains the lesson").

Passive voice: The object of the action becomes the subject of the sentence (eg. "The lesson is explained by the teacher.")

General structure for conversion:

- Identify the sub, verb, and obj in the sentence.
- Move the object to the subject position for passive voice.
- Adjust the verb tense and add a form of "to be" as needed.
- Add "by" to indicate the original subject if necessary.

Procedure/Activities

- 1) Identify whether given sentences are in Active or Passive voice.
- 2) Practice converting sentences from active to passive voice and vice versa.
- 3) correct sentences that have been incorrectly converted between active and passive forms.

Part 2: Dialogue Conversation

Theory:

Dialogue conversation involves an interactive exchange between two or more people. Practicing dialogue helps improve conversational skills, listening, response timing and adapting tone based on context.

Procedure/Activities

- 1) use prompts for common dialogue situations (e.g. ordering food, introducing oneself, discussing plans). Pair up and role-play these scenarios, practicing clear expression and active listening.
- 2) Prepare dialogues on given topics and present them in pairs, focusing on clarity, politeness, and appropriate language.

Feedback and Reflection:

Give and receive feedback on aspects like clarity, tone and engagement.

Experiment No. 5

Title: Individual presentation

Aim: To build confidence, clarity, and organization in public speaking by delivering a structured presentation on a given topic.

Requirements:

Notebook, pen, presentation topic assigned by instructor, any visual aids or props if needed.

Theory:

An individual presentation is an organized speech delivered by a single speaker to an audience. Effective presentations are clear, engaging and structured, generally consisting of an introduction, body and conclusion. Practicing presentation skills is essential for building confidence, improving communication, and effectively conveying ideas to an audience. Key elements of a good presentation include:

- Clarity: Presenting information in a clear and understandable way.
- Confidence: Speaking with poise and assurance.
- Engagement: Interacting with the audience and keeping their attention.
- Structure: Organizing the presentation with a beginning, middle, and end.

Procedure / Activities:

1) Topic Preparation:

- Choose or receive a topic from the instructor and research key points to present.

2) Organize content:

- prepare an outline with an introduction, main points, and conclusion. Use bullet points to help with clear and concise delivery.

3) Practice presentation:

- Rehearse in front of a mirror or with peers to refine delivery, tone and timing.

4) Deliver presentation:

- present to the class, focusing on eye contact, voice modulation, and audience engagement.

5) Feedback and Reflection:

- Receive constructive feedback from the instructor and classmates. Reflect on areas for improvement, such as pacing, content organization, and engagement.

Experiment No:6

Title: Extempore and Picture interpretation

AIM: TO enhance spontaneous speaking skills through extempore activities.

TO develop observation, interpretation, and verbal expression skills through picture interpretation.

Requirements:

Notebooks, Pen, List of extempore topics, a collection of images or illustrations for interpretation.

Part 1 : Extempore

Theory :

Extempore is a spontaneous speech exercise where the speaker delivers a short talk on a given topic with minimal preparation time.

This activity encourages quick thinking, organization of thoughts, and verbal clarity. Extempore topic can range from simple subjects (e.g. "My Favorite Hobby") to abstract ideas (e.g. "Success is a Journey"), challenging the speaker to articulate thoughts clearly and confidently.

Procedure/ Activities:

- 1) Each student is given a topic randomly and allowed 1-2 minute to prepare
- 2) The student delivers a 2-3 minute speech on the assigned topic, focusing on clear expression and confidence.
- 3) Peers and the instructor provide feedback on the speech's organization, clarity and engagement, helping the speaker reflect and improve.

Part 2: Picture Interpretation

Theory:

Picture interpretation involves analyzing an image or illustration and expressing observations, interpretations, or stories inspired by it. This activity helps in developing observational skills, critical thinking, and creative verbal expression. Images might depict real-life scenes, abstract art, or symbolic elements that prompt different interpretations.

Procedure / Activities:

- 1) Each student is shown an image and given a few moments to observe and think about it.
- 2) The student describes what they observe, interprets possible meanings, and constructs a narrative or message inspired by the image.
- 3) Discuss different interpretations with the group, appreciating varied perspectives and insights.

Experiment No: 7

Title: Vocabulary Building Exercise (word often confused)

Aim: To enhance vocabulary skills by learning to distinguish between commonly confused words, improving word choice accuracy in communication.

Requirements: Notebook, pen, list of commonly confused words with definitions and usage examples.

Theory:

English contains many words that sound similar or have close meanings but differ in usage and context. Confusing such words can change the intended meanings of a sentence. Examples include:

- Affect vs Effect: "Affect" is a verb meaning "to influence," while "effect" is a noun meaning "a result".
- Complement vs Compliment: "Complement" means something that completes, whereas "compliment" means a polite expression of praise.
- Accept vs Except: "Accept" means to receive, while "except" means to exclude.

Understanding and correctly using these words enhances clarity and professionalism in communication.

Procedure / Activities:

1) Matching Exercise:

- Match commonly confused words with their definitions or usage examples to reinforce understanding.

2) Fill in the blanks exercise:

- complete sentences using the correct word from a pair of commonly confused words (e.g. "affect / effect"), based on context clues.

3) Sentence construction Exercise:

- create sentences using each word from selected pairs to demonstrate correct usage.

4) Peer Review exercise:

- Exchange sentences with a partner and check each other's use of commonly confused words, discussing any corrections needed.

Experiment No: 8

Title: Group Discussion

Aim: To develop effective group communication skills, including clear articulation, active listening, critical thinking, and teamwork, through structured group discussions.

Requirements: Notebook, pen, a list of discussion topics, and seating arranged to encourage group interaction.

Theory:

A group discussion (GD) is a structured form of communication where participants exchange ideas, opinions and information on a specific topic. GDs are commonly used to assess a person's communication skills, analytical ability, and teamwork. Key skills developed in group discussions include.

Phases of Group Discussion:

- 1) Introduction: Participants briefly introduce themselves and the moderator introduces the topics.
- 2) Discussion: Participants share ideas, respond to others, and engage in a focused discussion.
- 3) Conclusion: The group summarizes the main points and may reach a consensus or agree on differing views.

Procedure/Activities:

- 1) Topic selection:
 - The instructor assigns or allows the group to choose a relevant topic for discussion (e.g. "Is online education as effective as traditional education?")

2) Preparation and Brainstorming:

- participants take a few minutes to gather their thoughts and key points on the topic

3) Conducting the Discussion:

- participants begin the discussion, each ~~part~~ presenting their views, asking questions, and responding to others.
- Focus on clear expression, balanced participation, and constructive engagement.

4) Feedback and Reflection:

- After the discussion, participants receive feedback on clarity, confidence, and teamwork. They reflect on what went well and areas for improvement.
-
